VOLUME 15

JOURNAL
OF THE
AMERICAN SOCIETY
OF
SUGAR BEET TECHNOLOGISTS

EXECUTIVE COMMITTEE

President ..... George E. Rush
The Amalgamated Sugar Company
Ogden, Utah

Vice President ..... M. A. Woods
Union Sugar Division
Betteravia, California

Secretary-Treasurer ..... James H. Fischer
Beet Sugar Development Foundation, Fort Collins, Colorado

Immediate Past President ..... Lloyd T. Jensen
The Great Western Sugar Company, Denver, Colorado

BOARD OF DIRECTORS

Pacific Coast Region:	D. D. Dickenson
Intermountain Region:	Ronald C. Johnson
Eastern Rocky Mountain Region:	Whitney Newton II
North Central and Great Lakes Region:	W. D. Foley
Canada:	J. W. Hall
Processing at Large:	C. W. Hogge
Agricultural at Large:	D. L. Sunderland

Manuscripts submitted for publication and communications pertaining to editorial matters should be sent to James H. Fischer, Secretary-Treasurer, American Society of Sugar Beet Technologists, P. O. Box 538, Fort Collins, Colorado 80521.

Each manuscript received for publication will be appraised for its technical and historical value by a Publications Committee. The Publications Committee shall have final authority regarding publication of manuscripts. The Journal of the American Society of Sugar Beet Technologists shall contain papers presented at General and Regional meetings and articles of immediate interest prepared specifically for this periodical.

Material submitted to the Publications Committee for publication becomes the property of the American Society of Sugar Beet Technologists. The Publications Committee will have jurisdiction over the release of papers and abstracts for use other than in the Journal.

AUTHOR INDEX

Abu-SS
Abu-Shakra, S.
Effect of water extract of sugarbeet on the germination of other crop seeds----------15(6) 489

AfanMM
Afanasiev, M. M.
Selection for resistance and chemical control of *Rhizoctonia* root rot of sugarbeets---------15(2) 151

AqilBA
Aqil, B. A.
Effect of water extract of sugarbeet on the germination of other crop seeds----------15(6) 489

BaldDE
Baldridge, D. E.
Selection for resistance and chemical control of *Rhizoctonia* root rot of sugarbeets---------15(2) 151

BaldCS
Baldwin, C. S.
The effect of nitrogen on yield, percent sucrose, and clear juice purity of sugarbeets----------15(6) 522

BarrWW
Barr, W. W.
Millipore-antimony pentachloride colorimetric method for the rapid determination of saponin in refined beet sugar----------15(6) 495

BeckCF
Becker, Clarence F.
The influence of planting rate and thinning method on sugarbeet stand----------15(2) 177

BergeS
Bergeson, Shelton
Comparison of sugarbeet single-cross hybrids with double-cross hybrids for seed and root characteristics----------15(8) 726

BernWO
Bernhardt, W. O.
Application of sensitive adiabatic calorimetry to beet industry problems----------15(3) 235
Control in carbonation----------15(5) 384

BeutLK
Beutler, L. K.
Effect of postemergence applications of herbicides on sugarbeet development and weed control in central California---------15(3) 200

BichSE
Bichsel, S. E.
Operation of the Hamilton City experimental ion exchange plant----------15(4) 324
The determination of trace metals in process juices and white sugar----------15(5) 369

BilgeT
Bilgen, Talat
Transferring cercospora leaf spot resistance from *Beta maritima* to sugarbeet by backcrossing----------15(5) 444

BirdRJ
Bird, R. J.
Sugarbeet virus diseases in Arizona, 1965-1968----15(5) 450

BlakRW
Blake, Richard W.
The future of the sugarbeet industry from a growers' viewpoint----------15(1) 6

BlanWW
Blankenbach, W. W.
Waste water recirculation as a means of river pollution abatement----------15(5) 396

BrimhP
Brimhall, Phillip
Respiration of sugarbeets following harvest in relation to temperature, mechanical injury and selected chemical treatment---------15(8) 671

BrubRW
Brubaker, R. W.
Comparison of the effect on beet seed production of spring and fall infestations of beet leafhoopers carrying curly top virus----------15(3) 214

BushHL
Bush, H. L.
The evaluation of and the use of the top-cross test as a method of selecting inbred lines of sugarbeets for general combining ability----------15(1) 49

CannRM
Cannon, Rowland M.
A processing executive looks at the future of the beet sugar industry----------15(1) 21

CaraFM
Carasso, F. M.
Relationship of date of planting and date of harvest to incidence of disease, stand survival, yield and sugar content of sugarbeets at Yuma, Arizona----------15(6) 528

CarpTD
Carpenter, T. D.
The determination of trace metals in process juices and white sugar----------15(5) 369

CarvNE
Carver, N. E.
Central tare laboratory operation----------15(4) 306

CaryJW
Cary, J. W.
Sugarbeet yields unaffected by afternoon wilting----------15(5) 416

CoeGE
Coe, Gerald E.
Relative damage of *Cercospora* leaf spot in sugarbeet varieties----------15(2) 95

CoopRC
Cooper, Robert C.
Treatment of sugarbeet flume waste water by lagooning, a pilot study----------15(4) 282

DaviJF
Davis, J. F.
The effects of potassium carriers and levels of potassium and nitrogen fertilization on the yield and quality of sugar beets 15(4) 298

DaviWH
Davis, W. H.
The evaluation of and the use of the top-cross test as a method of selecting inbred lines of sugarbeets for general combining ability----------15(1) 49

DextST
Dexter, S. T.
The use of food-grade phosphoric acid in processing sugarbeet diffusion juice to obtain a by-product feed supplement----------15(2) 167
Sorting sugarbeets by specific gravity to obtain more uniform samples for post-harvest studies----------15(5) 422
Damage to sugarbeet roots from various degrees of wilting at various temperatures-----15(6) 480

DillDR
Dilley, David R.
Respiration of sugarbeets following harvest in relation to temperature, mechanical injury and selected chemical treatment---------15(8) 671

DoneDL
Doney, D. L.
Screening sugarbeet for resistance to *Heterodera schachtii* Schm.----------15(6) 546

EastHE
Easton, B. E.
The agricultural executive looks at the future of the beet sugar industry----------15(1) 13

EisFG
Eis, F. G.
Scintillation counting techniques in the isotope dilution analysis for sucrose----------15(3) 228
Pan Scale----------15(4) 312
Control in carbonation----------15(5) 384

EricAW
Erichsen, A. W.
The evaluation of and the use of the top-cross test as a method of selecting inbred lines of sugarbeets for general combining ability----------15(1) 49

FifeJM
Fife, J. M.
Changes in concentration of free amino acids by selection from yellows infected sugarbeet leaves----------15(3) 259
Selecting sugarbeet for yellows resistance on the relative concentration of three amino acids in leaves of infected plants-------15(4) 318

FilbaC
Filban, Christina
Relation of sugarbeet seedling emergence to fruit size----------15(8) 703

FinkRE
Finkner, R. E.
Chemical control of Cercospora leaf spot of sugarbeets in Nebraska, 1965----------15(3) 221
The use of systemic insecticides to reduce the incidence of curly top virus disease in sugarbeets----------15(3) 246

FiscBB
Fischer, Bill B.
Effect of postemergence applications of herbicides on sugarbeet development and weed control in central California --------15(3) 200

FoggRA
Fogg, R. A.
The effects of potassium carriers and levels of potassium and nitrogen fertilization on the yield and quality of sugar beets----------15(4) 298

FoxCD
Fox, C. D.
Thin juice deliming with gel type cation exchange resins----------15(8) 665

FrakMG
Frakes, M. G.
The use of food-grade phosphoric acid in processing sugarbeet diffusion juice to obtain a by-product feed supplement----------15(2) 167
The effects of potassium carriers and levels of potassium and nitrogen fertilization on the yield and quality of sugar beets--------15(4) 298
Sorting sugarbeets by specific gravity to obtain more uniform samples for post-harvest studies----------15(5) 422
Damage to sugarbeet roots from various degrees of wilting at various temperatures----------15(6) 480

GaddiR
Gaddie, Robert
Decomposition of molasses pulp pellets in bulk storage----------15(4) 277

GascGJ
Gascho, G. J.
The effects of potassium carriers and levels of potassium and nitrogen fertilization on the yield and quality of sugar beets----------15(4) 298

GaskJO
Gaskill, John O.
Breeding for *Rhizoctonia* resistance in sugarbeet----------15(2) 107
A method of selecting individual sugarbeet roots for weight and sucrose percentage--------15(3) 187
Transferring cercospora leaf spot resistance from *Beta maritima* to sugarbeet by backcrossing----------15(5) 444

GoluCG
Golueke, C. G.
Biotreatment of Steffen house waste----------15(2) 125
Treatment of sugarbeet flume waste water by lagooning, a pilot study----------15(4) 282

GoodAE
Goodban, A. E.
The relation of beet molasses composition to true purity Part II. Statistical evaluation----------15(1) 73
The osmolality of sugarbeet press juices----------15(2) 120

HaddJL
Haddock, Jay L.
Mineral composition of sugarbeet plants as affected by varieties and genotypes----------15(5) 454
Nutritional conditions in sugarbeet fields of Western United States and chemical composition of leaf and petiole tissue, including minor elements----------15(8) 684

HaldHE
Halden, H. E.
Pan Scale----------15(4) 312

HaleGR
Hales, George R.
Standard liquor storage----------15(3) 209

HanzPC
Hanzas, P. C.
Determination of aflatoxins in moldy sugarbeet pulp----------15(5) 438
Millipore-antimony pentachloride colorimetric method for the rapid determination of saponin in refined beet sugar----------15(6) 495
Improved total phosphorus method for determination of Disyston in dried sugarbeet pulp----------15(6) 517

HardEE
Hardin, E. E.
Germination potential of monogerm sugarbeet seed as determined by field emergence and laboratory germination----------15(7) 607
The problem of underdeveloped seeds occurring in monogerm sugarbeets----------15(7) 625

HeckRJ
Hecker, R. J.
Transferring cercospora leaf spot resistance from *Beta maritima* to sugarbeet by backcrossing----------15(5) 444
Relation of certain amino acids to other impurity and quality characteristics of sugarbeet----------15(7) 562
Quantitative growth studies with sugarbeets *Beta vulgaris*----------15(8) 709

HendDW
Henderson, D. W.
Soil moisture conditions, nutrient uptake and growth of sugarbeets as related to method of irrigation of an organic soil----------15(1) 35

HillFJ
Hills, F. J.
Soil moisture conditions, nutrient uptake and growth of sugarbeets as related to method of irrigation of an organic soil--------15(1) 35

HillOA
Hills, Orin A.
Comparison of the effect on beet seed production of spring and fall infestations of beet leafhoppers carrying curly top virus----------15(3) 214

HolsEM
Holst, E. M.
Fertilizer results on sugarbeet in the Hereford, Texas area----------15(8) 661

HoovDA
Hoover, D. A.
Operation of the Hamilton City experimental ion exchange plant----------15(4) 324

HullR
Hull, R.
The effect of infection with beet yellows virus on the growth of sugarbeet----------15(3) 192

IchikK
Ichikawa, K.
Biotreatment of Steffen house waste----------15(2) 125

JackEB
Jackson, E. B.
Relationship of date of planting and date of harvest to incidence of disease, stand survival, yield and sugar content of sugarbeets at Yuma, Arizona----------15(6) 528

JameDW
James, D. W.
Factors affecting chloride uptake and implications of the chloride-nitrate antagonism in sugarbeet mineral nutrition----------15(8) 647

JensLT
Jensen, Lloyd T.
Presidential address----------15(1) 1

JohnRC
Johnson, Ronald C.
Simultaneous fumigating and planting of sugarbeets----------15(5) 379
The effect of bolting and seed stalk removal on yield and sucrose content of sugarbeets----------15(8) 657

JorgJD
Jorgensen, John D.
Decomposition of molasses pulp pellets in bulk storage----------15(4) 277

KerrED
Kerr, E. D.
Chemical control of Cercospora leaf spot of sugarbeets in Nebraska, 1965----------15(3) 221

KidmDC
Kidman, D. C.
Factors affecting chloride uptake and implications of the chloride-nitrate antagonism in sugarbeet mineral nutrition------15(8) 647
The effect of bolting and seed stalk removal on yield and sucrose content of sugarbeets-----15(8) 657

KohlRA
Kohl, R. A.
Sugarbeet yields unaffected by afternoon wilting--15(5) 416

LanglL
Langlois, L.
Thin juice deliming with gel type cation exchange resins----------15(8) 665

LeweRT
Lewellen, R. T.
Development of sugarbeet breeding lines and varieties resistant to yellows----------15(4) 347
Virus-yellows infected sugarbeet varieties: Effects of harvest dates and nitrogen fertilization----------15(5) 403

LoomRS
Loomis, R. S.
Soil moisture conditions, nutrient uptake and growth of sugarbeets as related to method of irrigation of an organic soil----------15(1) 35

LottLF
Lott, Lee R.
Standard liquor storage----------15(3) 209

LyonJW
Lyons, J. W.
The use of food-grade phosphoric acid in processing sugarbeet diffusion juice to obtain a by-product feed supplement----------15(2) 167

McCrRM
McCready, R. M.
The relation of beet molasses composition to true purity Part I. Composition----------15(1) 61
The relation of beet molasses composition to true purity Part II. Statistical evaluation----------15(1) 73
The osmolality of sugarbeet press juice----------15(2) 120

McFaJS
McFarlane, J. S.
Development of sugarbeet breeding lines and varieties resistance to yellows----------15(4) 347
Virus-yellows infected sugarbeet varieties: Effects of harvest dates and nitrogen fertilization----------15(5) 403

McGaTA
McGagin, T. A.
Scintillation counting techniques in the isotope dilution analysis for sucrose----------15(3) 228

McGiRA
McGinnia, R. A.
Application of sensitive adiabatic calorimetry to beet industry problems----------15(3) 235

MaagGW
Maag, Grace W.
Rapid digestion procedures for determination of metallic ions and total nitrogen in sugarbeet samples----------15(4) 361
Relation of certain amino acids to other impurity and quality characteristics of sugarbeet----------15(7) 562

MalmNR
Malm, Norman R.
The use of systemic insecticides to reduce the incidence of curly top virus disease in sugarbeets----------15(3) 246

ManuGD
Manuel, Guy D.
Management point of view on looking into the future of the beet sugar industry----------15(1) 31

MileCE
Miles, C. E.
The use of food-grade phosphoric acid in processing sugarbeet diffusion juice to obtain a by-product feed supplement----------15(2) 167

MillDE
Miller, D. E.
Emergence and development of sugarbeets as influenced by various soil mulches----------15(6) 463

MillPH
Miller, P. H.
Trends in nonsucrose constituents of central California beets II. Comparison of molasses produced at a straight house and Steffen house----------15(6) 470
Trends in nonsucrose constituents of Central California beets. I. Analysis of Steffen factory liquors----------15(7) 595

MillRD
Miller, Richard D.
Determination of nitrate nitrogen in sugarbeet petioles and soils with 2-6-Diemthyl phenol----------15(6) 504

MitchE
Mitchell, Earl
Effect of phenolic acids on alpha-amylase in vitro, and early growth of sugarbeet----------15(7) 556
